DETAILED ACTION

1. Claims 1-19 have been examined.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-19 are rejected under 35 USC 103(a) as unpatentable over Carlsmith(US Pat. No: 5,810,973) in view of Shackford(US Pat. No: 5,944,952)..
4. As per claims 1-19 Carlsmith teaches a stock preparation monitoring system(Abstract) (Figs 1-9)(col 3 line 54-col 4 line 54) as well as an apparatus to produce elongated multi-fiber particles(Fig 1) and a means of processing the stock by ozone bleaching(col 3 lines 54-66) as well as ozone consumed as a function of time at various concentrations(Fig 9).Shackford teaches a method of measuring physical parameters(Fig 2)(col 6 line 20-col 7 line 25) including consumption rates for O₃ for various concentrations(Fig 2) as well as the bleaching system for this process(Fig 3) and ozone-bleaching kinetics(Fig 6).It would have been obvious to one skilled in the art at the time of the invention to combine Carlsmith in view of Shackford to teach applicant's disclosure and to specifically apply the parameter measurement device to be wireless.

Art Unit: 3624

The motivation to combine is to teach a stock monitoring system whereby improved processing of stock is attained as enunicated by Shackford(col 3 lines 10-32).

Claim Rejections - 35 USC § 112

5. Claims 1-19 are further rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. More precision is necessary to explicitly state in the claims applicant's conception to permit resolution of the disclosure vis a vis the existing art.

Double Patenting

6. Claims 1-19 are also rejected under the judicially created doctrine of double patenting over claims 1-37 of U. S. Patent No. 6,267,847 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: a stock preparation system is disclosed in the prior patent to Doelle and in the present disclosure. Insufficient detail is provided in the currentt conception to distinguish the current application from the prior patent.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.
